## **Unjust and Undemocratic Colorado Supreme Court Decision**

[Berthoud, CO - Tuesday, December 19, 2023] - The recent decision by the Colorado State Supreme Court to remove President Donald J. Trump from the 2024 presidential ballot is a gross miscarriage of justice and a blatant affront to the democratic principles our nation holds dear. This decision, delivered without regard for the will of the people, is an egregious attempt to silence the voice of millions of Americans who overwhelmingly support President Trump.

As the current frontrunner in polls, showing clear support in both primary elections and head-to-head matchups against President Joe Biden, this ruling is nothing short of a perversion of the justice system. It undermines the core tenets of our democracy and disenfranchises voters who, through their democratic right, overwhelmingly support President Trump.

The Colorado State Supreme Court, in its overreach, has become a tool for those who seek to stifle political dissent and manipulate the electoral process. By disregarding the voice of the people, the court has set a dangerous precedent, signaling that the establishment is willing to trample on the fundamental principles of democracy to achieve its political objectives.

This decision not only impacts President Trump but also infringes upon the rights of every citizen who believes in a fair and transparent electoral system. The court's actions undermine the very essence of democracy by suppressing the political will of the majority and dictating an outcome that aligns with the preferences of a select few.

We condemn this unjust and undemocratic ruling in the strongest terms possible. It is an assault on the democratic ideals that our nation holds sacred, and it threatens the foundation of our electoral process. The people's voice must not be silenced, and we will explore all available legal avenues to challenge this affront to democracy.
